

I. PURPOSE

The purpose of this session is to introduce the IOPTP to the range of neurodevelopmental outcome and comorbidities for children born preterm and/or with cerebral palsy. The session will discuss the evidence of early developmental interventions for infants who are born preterm and/or with cerebral palsy including interventions that are effective and those which need de-implementation.

II. OBJECTIVES

After completion of this session, participants will be able to:

- Recognize the range of neurodevelopmental outcomes for children born preterm and/or with cerebral palsy.
- Understand the current evidence for early intervention for children born preterm and/or with cerebral palsy.
- Recognize the key ingredients of effective early intervention

III. AUDIENCE

The primary audience for this session is physical therapists who are working in clinical, academic and research settings with infants and young children who are born preterm, at high-risk of cerebral palsy and/or with cerebral palsy.

The International Organisation of Physiotherapists in Paediatrics
Invite you to our Fourth INTERNATIONAL Webinar
